NEWS RELEASE

FOR IMMEDIATE RELEASE

**MARSHALL COMMUNICATIONS CORPORATION'S SUCCESSFUL
SUPPORT TO DISA'S MILITARY UTILITY ASSESSMENT**

ASHBURN, VA. – August 2009 – Marshall Communications Corporation (MARSHALL) extended its expertise in support of the Military Utility Assessment (MUA) under its Tactical Service Provider (TSP) contract with the Defense Information Systems Agency (DISA) during July 13 -16, 2009. The MUA featured a special VIP Day for high level Government executives to witness a demonstration of a hybrid communications architecture using emerging standards-based, SATCOM, and wireless technology to extend global, wideband communications and services to the tactical edge including Digital Video Broadcast (S2), Return Channel via Satellite (DVB-RCS/S2) and WiMax mobile technologies which could be used by our soldiers, sailors and airmen in-theatre, to more efficiently accomplish their missions.

The MUA was supported in four (4) locations: U.S. Central Command (USCENTCOM) (MacDill AFB, FL); Joint Systems Integration Center (JSIC), (Suffolk, VA); U.S. Transportation Command (USTRANSCOM) (Scott AFB, IL); and MARSHALL's hub in Hagerstown, MD. The demonstration successfully showed fourteen mission vignettes, including applications such as Biometrics updating, Combat Camera Team video and stills and RF/ITV cargo in transit visibility tracking within seconds, as opposed to hours, as currently being done. Additionally, the demonstration also featured live video from Unmanned Aerial Vehicles (UAVs) to handheld devices and access to the NIPRNET and SIPRNET extended to workstations on attached local area networks. Invited guests were impressed and commented commitment to supporting this technology transition into the Global Broadcast Service (GBS), a one-way broadcast with pre-planned product improvements approved to add two-way services.

In attendance at the MUA in Tampa, FL, Mr. Bruce Bennett, Director, SATCOM, Teleport, & Services, (SES PEO-STs), at DISA was pleased as to successful execution of the Joint Capability Technology Demonstration, on budget, on schedule plus demonstrating superior capabilities than originally promised. Mr. Bennett has long been a major proponent of the capabilities planned for the Joint IP Modem, and extension of wideband capabilities via WiMax mobile technology to our troops on the ground. Other

VIPs in attendance included: Ms. Donna Durante, Program Manager, GBS JPO who stated “this is the future of GBS”; Mr. Dick Lee, OSD Oversight Executive (OSD AT&L); Mr. Marty Drake, CENTCOM J8, stating “this is the technology that will make a difference on the battlefield” and Joint Staff AOs.

Please stop in to visit MARSHALL in booth #1104 at the upcoming MILCOM 2009, October 19-21 in Boston, MA and the 5th DOD Commercial SATCOM Users’ Workshop, December 8-10 in Arlington, VA.

ABOUT MARSHALL

Headquartered in Ashburn, VA, Marshall Communications Corporation is a small disadvantaged (SDB-certified), Veteran-Owned Small Business (VOSB), and was established in 1991. MARSHALL has been providing high quality satellite communications and multimedia networking solutions including full turnkey systems engineering and integration using COTS to DOD and non-DOD Agencies for over 17 years. MARSHALL was awarded a Schedule 70 (Contract # GS-35F-0195S) by the GSA Federal Supply Service (FSS) in February 2006; and a Seaport-e (Contract # N00178-07-D-5143) in June 2007 and an Indefinite Delivery, Indefinite Quantity (IDIQ) contract by the U.S. Navy Department in September 2008. MARSHALL’s team has over 100 years of satellite communications network operations, planning, and systems engineering experience - inclusive of Cisco Certified Engineers. The Company specializes in “Best of Breed” in standards-based, open architecture systems and delivering satellite-based IP network solutions that are cost effective and promote quality of service and reliability. MARSHALL can be viewed on the Internet at <http://www.marshallcomm.com>.
